### WHAT COMES AFTER U.F.A. GOVERNMENT

Surely nothing could convince the people of Alberta more effectively than the developments of the present session that the U.F.A. Government has reached the end of its administrative usefulness and initiative. Bill after bill has been introduced in the closing weeks of the session which could only be explained by a last despairing endeavor to appeal to the clear consciousness which has rolled on several occasions to maintain the Farmer government in office. The conduct of the government and its following during the present session in presenting and upholding measures which in the near future may do irreparable damage to the province and its credit can only be understood in the light of a gambler's last throw of the dice.

Out of the present chaotic political condition which prevails in Alberta today, only one development looks certain. It is that after the provincial elections a new government will be swept into office. There is a situation in evidence in this province today which in many respects is comparable only to that which prevailed prior to the election in 1921. Benefiting by a wave of evangelical pleading and fervor, very similar to that proceeding from the pulpit of the Calgary Prophetic Bible Institute right now in which religion and social credit are hopelessly mixed, the Farmer party assumed power in 1921. The group which fourteen years ago proclaimed its intention to create something new and finer in provincial administration and public life, and which held the two old parties up to scornful scorn, is in turn held of popular appeal and bankrupt in administrative justification for a further lease of power.

However, the overthrow of the U.F.A. Government does not assure a betterment in condition for

the province unless men and women with a serious stake in Alberta rally to ensure that its successor will be an improvement. To put men in charge who are presenting a demagogic lure of something for nothing to the unthinking elements will make matters much worse. That is the immediate and most vital threat confronting Alberta today. The province has been drifting steadily toward insolvency during the past fourteen years. A public debt of \$65,000,000 in 1921 is today near, if not above the \$150,000,000 mark. Unbalanced budgets and constant borrowing have become routine proceedings. Retrenchment in good times when there was no unemployment relief to finance was neglected. The province has been allowed by the present administration to drift perilously close to financial embarrassment when further borrowing will be impossible. There has been a lack of constructive leadership when it was most needed.

### SUNDAY SPORT.

A clerical delegation to the Church of England's diocesan synod conference at Montreal has raised the question of what is reported as describing "commercialized" Sunday sport. The complaint seems to be that commercialized sport is keeping the young people and children out of Sunday school.

More than one question is involved. If the returned delegate's only objection to commercialized sport is that it interferes with his Sunday school why, one might inquire, not change the hour of the Sunday school so that the pupils might enjoy both? Or is the objection to commercialized sport, and especially to commercialized sport on Sunday? This returned delegate did not appear to take the view that Sunday sport as such is wrong; his objection therefore, presumably, to Sunday sport on a commercial scale. Or will he tolerate Sunday sport on a commercial scale if it does not interfere with the Sunday School?

If Sunday commerce is wrong, obviously Sunday commercial sport is included and the reverend objection is well taken. But he, himself, does not concede that Sunday sport is wrong; without knowing the reverend gentleman we permit ourselves to imagine that he is the sort of person who has a hockey rink next the church and a parochial tennis court across the street. Sport, we permit ourselves to suppose, is for him not a competitor but a coadjutor of the Sunday school and the church; physical and spiritual soundness, we think he will agree, are allies.

The objection, then must be to commercial sport on Sunday—games at which admission is charged. If pure, clean sport interferes with the Sunday school the Sunday school hour can be changed.

### SPRUCEVIEW NEWS

Don't forget the dance on Friday, night May third, in Spruceview Hall, put on by the Juniors. Good music by Hughes Orchestra.

Mrs. Honth Sr., has just arrived from New York, for an extended visit to the home of her son. Mr. Ernest Heath.

The regular monthly meeting of the Busy Bees will be held on Saturday night, May 4th at the home of Mrs. Laura Young.

Mr. and Mrs. Nelson Hall spent Sunday at the home of Mr. and Mrs. Clarence Kasha.

A large crowd attended the Play and dance at the Hall last Friday evening. The Play was splendid, and everybody had a good time at the dance.

### FOR SALE

Good C.P.R. half section, close to Town. Easy terms. Frazer-MacDonald.

## Lacombe Will Celebrate King George's Jubilee on Monday, May 6th

Lacombe will fittingly celebrate the King's Jubilee, Monday, May 6, with a splendid program of sports, community singing, and a huge bonfire. Following is the program of the day's events:

11 a.m. A united service of all churches at St. Andrew's Church, O Canada.

Hymn, Kipling's "Recessional".

Recitation, "Gentlemen, the King," Geo. Marshall.

Solo, "Land of Hope and Glory," Mrs. T. Wilkes.

Speech, "King and Empire," Mayor Edwin H. Jones.

Prayer, "King, Country and Empire," Rev. T. H. Chapman.

National Anthem, "God Save the King".

Committee: Rev. Layton, Rev. Chapman, Rev. Isler.

1:30 Children's Sports to be held in the Football grounds. All children welcome, both country and town, come and have a good time.

Free Ice Cream. Races.

Committee: Mr. Lavery, Mr. Cruickshank.

4:00 Football. On the Football Grounds. Committee: Mr. D. Cameron, Mr. H. Law.

6:30 Soft Ball, on the Football Grounds. Committee, Mr. A. Penman.

8:00 The Lacombe and District Brass Band have kindly consented to play in the Town and after their selections, will parade to the Bonfire.

Committee: Mr. Wright, Conductor; Mr. I. Gottschlich, Press.

8:30 Parade to the Bonfire: Where a Royal Salute of 21 Rockets will be fired off. Committee, Mr. R. Rhind and Mr. C. E. Todd.

8:45 Bonfire will be lit by Mr. H. Trane, President of Lacombe and District Board of Trade.

Patriotic Songs will be played by the Band and everyone asked to sing. Committee: Mr. A. Dwan.

9:30 The Siren will blow and the Lacombe Fire Brigade will turn out and put out the Bonfire. Committee in charge, Chief Sage.

10:00 Free Dance in Bob Park's New Garage, everybody welcome.

Card Parties at both the Adelphi and Empress Hotels, Free.

The Committee in charge are particularly anxious that everyone should have an enjoyable day that will long be remembered, so come and enjoy yourself, and let's make it a real day. Executive Mr. S. Boyd, Mr. Jack Morrison, Mr. C. Macle, Mr. R. D. Thompson.

Members of all the Committees are requested to meet at the Town Hall, Friday night at 8 o'clock p.m., May 3rd, to work out the details of the program. T. Wilkes, Chairman.

Children's Sports

Boys and Girls Race, 5 to 7 years, 25 yards.

Boys' Race, 7 to 10 years, 50 yards

Girls' Race, 7 to 10 years, 50 yards

Boys' Race, 10 to 12 years, 50 yards

Girls' Race, 10 to 12 years, 50 yards

Boys' Race, 13 to 15 years, 100 yds.

Girls' Race, 13 to 15 years, 100 yds.

Boys', Open, 100 yards.

Girls' Race, open, 100 yards.

Married Ladies' Race, 75 yards.

Paper Sack Blindfold Race, 50 yds.

Boat Race, 50 yards.

Sack Race, 50 yards.

Coat Race, 50 yards.

Boys' Potato Race, 12 to 16 years.

Girls' Potato Race, 12 to 16 years.

The committee in charge urge all teachers in the surrounding districts to co-operate in advertising these Sports in their schools.

### "VIVA VILLA" TAKES ITS PLACE IN LIST OF WORLD'S GREATEST SCREEN CLASSICS

"Viva Villa" Metro-Goldwyn-Meyer's spectacular story which shows at the Avalon Theatre this week, is generally classed among the world's greatest screen masterpieces of all time.

Filmed largely in Mexico, with Wallace Berry as the star and with an exceptional supporting cast, "Viva Villa" has emerged as one of the truly great productions of recent years.

More than 100,000 Mexican natives were used during the production, as many as 6000 appearing on the screen at one time.

Months were spent by the stars in the remote interior of Mexico, their only means of communication with the outside world being by airplane.

In its battle scenes, including the storming and capture of Mexican cities which were in newspaper headlines during the dozen years of Villa's turbulent reign, have been classed with the unforgettable march of the Cossacks in "The Birth of a Nation," with the chariot race in "The Ten Commandments" and with the Oklahoma land rush in "Cimarron."

Added to its lavishness is a fictional romantic story which runs through the photoplay, presenting Berry in the first time in many years as a lover.

With Berry in the notable cast appear Leo Carrillo, Fay Wray, Donald Cook, Stuart Erwin, George E. Stone, Joseph Schildkraut, Katherine Demille, Philip Cooper, Frank Puglia, Henry B. Walthall, David Durand, Francis X. Bushman, Jr., Adrian Rosley and Henry Armetta. The picture was directed by Jack Conway.

COMING Shirley Temple in "Little Miss Marker," May 9, 10 and 11.

"Tarzan and his Mate," May 16, 17 and 18.

### ST. ANDREW'S CHURCH

On Sunday evening a special patriotic service will be held in connection with The King's Jubilee. The members of all churches in Empire are to engage in Thanksgiving on that occasion.

The monthly meeting of the Board will be held in the Church Hall at 8 p.m. Tuesday, May 7th.

### BAPTIST CHURCH

"Jesus the finality in Religion." Sunday evening at 7:30.

Sunday School at 11 a.m.

Junior at 6:15.

Young People's meeting Monday at 8.

Monthly prayer and business meeting this Friday at 8 p.m.

### CORPORAL MORIARTY DEAD

His many friends here in Lacombe will be grieved to hear of the tragic death of Corporal Michael Moriarty. Corp. Moriarty was stationed at Lacombe some years ago and made many friends by his genial personality. He was killed last week at Drumheller while making an arrest. He was about to serve a summons on a farmer by the name of David Knox for threatening Bailiff D. A. Oliver with a rifle. Moriarty had entered the farm yard and turned around to close the gate when Knox fired at him with a rifle, the bullet entering Moriarty's back, inflicting a terrible wound. Moriarty died almost instantly. Constable Allan, who had accompanied Moriarty to the Knox farm, made a heroic attempt to save Moriarty from further bullets and returned Knox's fire while he attempted to drag Moriarty to the car. Later in the day, police from Drumheller and Calgary detachment surrounded Knox in a granary where he was killed.

The coroner's jury decided that Knox came to his death by suicide. Some doubt was expressed by witnesses who believed that Const. Allan may have fatally wounded him when he ran from the farm house after killing Moriarty.

### PROVINCIAL ELECTION FRIDAY, JUNE 28

EDMONTON, April 27—Alberta's general election is likely to be held on Friday, June 28, according to an official word emanating from the legislative buildings and while Premier Reid is reticent as to the actual date, this is believed very close to the mark set by the cabinet.

This discounts rumors current immediately after prorogation of the House, that the election would be called at the earliest possible date, or immediately after the 30-day period which must elapse following proclamation of the writ.

The late June date is considered much more likely in view of the fact that Major C. H. Douglas is now on his way to Alberta on request of the government to act as its adviser on social credit problems, and if his advice is to have any effect on the result of the poll, some weeks will probably be allowed to elapse to disseminate his findings and opinion regarding the Abershart system and the possibility of its application in Alberta.

It is expected Major Douglas will reach Edmonton about May 4.

It is also reported here that a number of school inspectors have notified that school buildings in their inspectorates will be required as polling places late in the last week of the term.

### SOMETHING NEW IN PIONEERING

The American frontier has now moved north. Two hundred families in farming districts in Michigan, Wisconsin and Minnesota are settling this year in Alaska. They are to occupy land in a fertile valley one hundred and twenty-five miles north of Seward, where there is said to be room for eight hundred and fifty more with the holdings limited to forty acres. While they will have to face rigorous conditions, they have been chosen with that in view and if they turn out to be the right sort their prospects of making a good living in their new homes are said to be good.

The migration differs from that which has lasted over so many years and brought the opening of the west. These who participated in the latter had to look after themselves and it is a great record of individual achievement, with many romantic aspects, that they have to their credit. The Alaskan settlers are being cared for by a government agency, which has built substantial homes in advance of their arrival. These will cost about \$3,000 each and be equipped with running water though without electricity or baths. Thirty years is to be given for purchase of Magnet Lodge No. 12, and S. Andrews, of Alib, were also speakers. Members of Lacombe Rebekah Lodge were included among the guests at the supper.

### THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe INCUMBENT: Rev. T. H. Chapman May 5th, 2nd Sunday after Easter 10:00 a.m. Sunday School. 11:00 a.m. Morning Prayer and Sermon.

7:30 p.m. Evening Prayer and Sermon.

TO BE KEPT IN MIND: May 11-12, Vocational Conference at Red Deer, for all Anglican Teen-age boys and girls. Please see posters.

Confirmation May 19th, 7:30 p.m. Young People's Conference in Calgary, May 25-26.

CHIEF MACDONALD GIVES notice that Dog tags are now on sale at the Town Office and all owners of dogs should have their dogs registered before May 15th. After that date untaxed dogs will be impounded.

### I.O.O.F. DISTRICT MEETING

Murray Saunders, Grand Master, I.O.O.F., was an honored guest at the District Meeting of District No. 20 held in Lacombe on Monday evening. Representatives were present from Mirror, Alib, Olive and Lacombe Lodges, also a number of members from Red Deer.

F. R. May, of Olive, a member of 25 years standing, was presented with his Veteran Jewel, the Grand Master making the presentation.

Ray Saunders, Lacombe, newly elected District Deputy Grand Master, was installed, the ceremony being performed by the Grand Master, assisted by the retiring Deputy, A. R. Haskins, who was also presented with the Past D.D.G.M.'s Jewel.

Following an interesting meeting, a delightful address was given on the principles of the Order by Mr. M. Saunders, and also brief remarks were heard from the Past District Deputy Grand Masters, O. Ditt, N. Longstreet, R. Haskins and R. May of Olive; T. Wilton, Alib; J. F. McLeod, Mirror; and C. E. Todd and D. Cameron of Lacombe. Dr. E. M. Sharpe, a charter member of Magnet Lodge No. 12, and S. Andrews, of Alib, were also speakers. Members of Lacombe Rebekah Lodge were included among the guests at the supper.

STICK ALL DAY LONG WITH DR. WERNER'S POWDER

Also to all users—places can't slip or slide—never causes soreness because teeth fit snugly as natural case—largest seller in the world—your dentist knows why he prescribes it—small cost.

## WORLD HAPPENINGS BRIEFLY TOLD

Last year the Canadian National Railways established 2,263 agricultural families on 335,125 acres of land and the annual report of the system, tabled in the House of Commons, said:

Plans for a six-mile railroad tunnel under the channel between the Japanese mainland and Kyushu Island to cost \$5,400,000 are announced by the minister of railways.

In an effort to unite all phases of the poultry industry, the Manitoba Poultry Federation has been formed at Winnipeg. Robert C. McGregor, Carman, Man., was elected president.

The British government has received a communication from the Canadian government raising further objection to the 1935 contract for sale of Russian timber in Britain, the House of Commons was informed.

Sir Edward Albert Sharpey-Schafer, inventor of the famed "Schafer method of artificial respiration," died March 30 in his Northumberland home. He was 85 years old.

Revision of the lists of electors throughout Canada will begin on May 15 next and end July 1. A proclamation by Col. John Thompson, Dominion franchise commissioner, published in the Canada Gazette, fixes these dates.

The first three months of 1935 brought a big increase in building industry in Canada, contracts awarded totalling \$29,391,300 compared with \$19,835,500 in the same period of 1934. The increase was 48 per cent.

Dr. Frank G. Vizetelly, of New York, who has lived intimately with words for almost half a century as editor of the Funk and Wagnall dictionaries, celebrated his 71st birthday hard at work compiling a new volume of 200,000 words.

## A Queer Combination

### Six Blind Musicians Will Play For Deaf Dancers

Six blind musicians in England can also thank the wireless for allowing them to form their own orchestra. By listening in to different broadcasts, they memorized various pieces by memory, being the only way in which they could learn the music, of course. Next month they are to play at a dance in Leeds Town Hall. The dancers will all be deaf-mutes who have had to use their eyesight to learn the steps, not being able to hear their instructor. They are taught by watching the steps of couples who are normal. On the face of it this queer combination of dancers and musicians may appear pathetic. But it is not rather triumphant—that handicaps are not insurmountable? The musicians will not see the dancers, the dancers will not hear the musicians... but the spirit is there!

### China Buys Old Tires

The Chinese market is beginning to absorb immense quantities of old worn-out automobile tires bought up in the United States market. One steamer recently took 100 pressed bundles of old tires, averaging 20 to each bundle to Shanghai. These are largely used as soles for sandals worn by coolies and peasants.

Mothers really are wonderful. Their love doesn't depend on how much they are getting.

The Tagus river is the largest river of the Iberian peninsula.

Hawaii may have a gross income tax on business.

## TIREDS and IRRITABLE

DO you feel weak and nervous? Is your housework a burden? Take Lydia E. Pinkham's Vegetable Compound. Mrs. M. A. Kelly of Woodstock, New Brunswick, says: "I was weak and rundown. A neighbor brought me Lydia E. Pinkham's Vegetable Compound. It helped me so much that I am taking it now as the change."

Get a bottle NOW. It may be just the medicine YOU need.

Try Lydia E. Pinkham's VEGETABLE COMPOUND

## YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

Mrs. L. R. writes as follows: "I am a widow with two children, and have been corresponding with a man from the West. He wishes to marry me, and although I have never seen him, his letters are so pleasant that I find myself drawn to him. He is married, but has not lived with his wife for some years, and offers to get a divorce if I accept his offer of marriage. I feel that I should remarry, because I am still young, but I naturally don't want to make a mistake. My first marriage was very happy, and my husband left me a substantial sum of money. Any help you care to give me will be welcome."

I am sorry that I cannot be over-optimistic about your chances of making a really favorable marriage with this man. Mrs. R. is not generous—he is, as a matter of fact, rather a narrow point of view; he is likely to get very irritable, if not bad-tempered, and whilst a lot marked capacity for affection, you are allied as it is in this case with narrowness of mind, it shows that this man is not easy to live with.

He is rather changeable, too. He will be inconsistent, not at all stable, temperamental, but, sickle in his moods. It would be difficult to understand him at times.

Another characteristic that stands out in this man's vanity. He expresses this in one of his letters to you when he remarks on the number of lady friends that he has had, and whilst he is in no way conceited, a subtle compliment to you, in that he prefers you to all the others, this is shown conceit. And his handwriting bears this out very clearly.

I mentioned that he is not very generous. I would go further and say that he is economical and cautious to the point of parsimony.

As regards yourself, your writing shows that you have a rather emotional nature, you are quick to feel joys and sorrows, and possess a marked capacity for affection. You are essentially a nature that needs company. There is nothing of the cold or aloof type about you. You are ardent, loving, spontaneous, lots of fun, and have a liking for being "on the go."

You are still young, and I certainly agree with you that marriage would be an excellent thing for you. I provided that you get the right sort of partner. Your previous happy choice has given you a standard that it may not be easy to parallel. But I have no doubt the opportunity will again arise. In the meantime, I am sorry that I cannot advise you to accept the man whose writing you sent to me, without at least, taking an opportunity of checking up my naming up of his character.

Would you like an analysis of your character? And how your friends whose real natures you would like to know? Send specimens of the writing you wish to be analyzed, and a blanked in each case, and enclose 10c coin for each specimen. Send with 3c stamped addressed envelope. Mr. Lawrence Hibbert, Grapho-Analyst, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. Letters are confidential and replies will be sent as quickly as possible.

## Not An Easy Job

Woman Is Head Of Thermometer Checkers At Washington

Life is no bed of roses for thermometer readers, says Miss Johanna Busse of the bureau of standards at Washington.

Miss Busse is the only woman head of a bureau section. It is the job of her staff of women to check thermometers for the nation's manufacturers.

The job includes placing thermometers in about 100 immersions in boiling water and oil and in molten tin at temperatures ranging from 40 degrees below zero to 900 degrees above. Cold hands and scorched fingertips are the lot of Miss Busse.

She said thermometers are "tricky" instruments, some only approximating temperatures. That caused by the bulb, she explained, which not only varies in the same type of instrument, but changes size from time to time due to expansion and contraction.

In addition, Miss Busse added, thermometer tubes frequently have an uneven bore.

Polish Scientist With Secret Z-Ray Claims New Extraction Process

What would happen if Professor Dunkowsky, the Polish scientist, should prove his claim that by his secret Z-ray process he can extract from auriferous earth eight times more gold than is possible by the methods hitherto employed?

Authorities in Paris said that it would mean the conversion of the precious metal into a base one, perhaps of no greater value than lead. But the same authorities ridicule such a possibility despite the report of M. Bonn, expert in chemistry to the Paris courts. After testing Dunkowsky's apparatus at San Remo, Italy, he says it is unquestionable that it permits the extraction of much larger quantities of gold than any other known process.

Maitre Jean Charles Legrande, the Paris lawyer, stated that he intends to demand a retrial of the case in which the Paris court sentenced Dunkowsky to two years' imprisonment for fraud.

Copper mining in Arizona's chief industry.

## Tribute To John Buchan

Man With Faith In Empire Says New York Times

In a tribute to Canada's newly-appointed Governor-General the New York Times editorially says:

"When Colonel John Buchan was here a few months ago he remarked while the British Isles were 'fairly well integrated' the British Empire was still 'in the making,' that there could be no closer link between Britain and America than that they should be engaged together in the great and laborious task of establishing the balance of land and liberty which is the only meaning of civilization."

"It is a great asset for that cause that he to whom America is as 'a second fatherland' is to have official governance where the empire touches most extensively and most intimately by our republic. That he starts with a 'hopeless prejudice' in our favor we interpret to mean that at least there is no condemnation."

"On his recent unofficial visit to this continent he expressed a firm belief in democracy—that no state mechanism, however perfect, can get rid of the initiative and responsibility of the ordinary individual. It is to be expected that he will in his official life give notable illustration of that faith which he has unofficially and eloquently spoken for the two great English-speaking nations."

## Recipes For This Week

(By Betty Barclay)

### APRICOT AND PINEAPPLE DELIGHT

½ cup dried apricots  
2 cups apricot juice and water  
½ cup quick-cooking tapioca  
½ cup granulated sugar  
¼ cup brown sugar, firmly packed  
½ teaspoon salt  
2 slices canned pineapple finely cut

½ cup pineapple juice  
½ cup apricot lemon juice  
Cut apricots in half, cover with water and soak 2 hours. Cover, and simmer 15 minutes, or until tender. Drain, measure liquid and add enough water to make 3 cups. Combine with apricots and remaining ingredients in greased baking dish, mixing thoroughly. Bake in moderate oven (375 degrees F.) 30 minutes, or until done, stirring every 10 minutes, and again when removing from oven. Serve with cream. Serves eight.

### LIMA SALAD

1 cup cooked, dried Lima  
2 tablespoons minced onion  
½ cup diced, cooked beets  
2 tablespoons finely chopped parsley  
¼ cup French dressing  
1 teaspoon Worcestershire sauce.  
Mix ingredients and chill before serving. Arrange on lettuce.

### A Vest-Pocket Radio

Shows Receiving Range Of Over Mile In Test

A wireless receiving set, no bigger than a small packet of cigarettes, has been invented by two policemen in Wigan, Lancashire, England. The set was constructed from odds and ends picked up at the fire station.

The inventors claim an officer on patrol duty equipped with such a set could receive rush messages from headquarters. The chief constable and members of the police committee went out to a country spot more than a mile from police headquarters and listened to instructions being given to a constable over the pocket set.

Look over the hoes occasionally, and grease the blades if they are growing rusty. A rusty hoe is a poor tool.

The Mixtec Indians of Mexico became famous weavers of taffetas and other fine silks in Spanish colony times.

All maples have sweet sap, but some species contain too little sap or sugar to be worth tapping.

Pure water is densest and heaviest at 4 degrees Centigrade.

Cover Shelves with HANDI-ROLL

26 feet of white or coloured paper for kitchen use—covering shelves, lining drawers, etc.

Appelford PAPER PRODUCTS

## Why He Was Excited

British Tommy Dropped Bomb Sandwich Into Ballot Box

A friend of mine who was playing an official part in the management of the Saar plebiscite tells me of one incident which every student of international government will well preserve. British soldiers were carrying the carefully sealed ballot boxes into the room where the counting was to be done.

At one of the tables a Dutchman was heard in voluble dispute with a British Tommy. The Dutchman, who talked English, was perplexed and annoyed because he could not understand a word the Tommy said. My friend went to the rescue, but was quite unable to act as interpreter. The Tommy's Yorkshire was too broad.

A sergeant who knew him was called in to help. He explained that Yorkshire was sometimes like that when talked by men who were drunk or excited. It turned out that the Tommy had quite good reason for being excited. He had dropped his ham sandwich into the ballot box.

To retrieve the sandwich meant specially opening the ballot box before the proper witnesses and with due formalities. When various protocols had been filled up and the proper officials had signed the necessary documents, the box was solemnly opened, the sandwich retrieved, and an international incident closed in perfect amity.—New Statesman and Nation.

## The Smallest Dynamo

Hungarian Has Made One No Larger Than Fly

Unemployed Istvan Zimmerman is displaying in Szekesfehervar, Hungary, a dynamo which he claims is the smallest in the world. It is about the size of a common fly, being four millimetres high. The assembling of the parts was done under a home-made microscope. It required four months to prepare the drawing and make the device.

## FASHION FANCIES

## SLIM LINES AND SMART!

Ellen Voss offers pattern of this simple smart dress, so exceedingly becoming to figure no longer slim. Style No. 684.

Pattern 20 each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg.

## Historic Chapel Reopened

Forlorn Corner Of Sheffield Cathedral Has Been Restored

South Yorkshiremen the world over will hear with interest of the reopening by Dr. Leonard Burrows, Bishop of Sheffield, of the historic Shrewsbury chapel within Sheffield cathedral.

It is more than four centuries since what was then the old parish church of the city of cutlery lost that portion of the building known as "Our Lady's Aisle and Her Chapel."

In the centuries which have since passed, the chapel has remained, until now, merely a forlorn corner of the church, and was noted only as a burial place of long-forgotten members of the family of which the Zaris of Shrewsbury were the head.

The chapel has now been suitably restored and decorated. The north choir aisle and the Bowley Hill chapel have likewise been restored. The organ is being moved to the west end of the cathedral and this will enable the chapel to return to the dimensions originally planned by its medieval builders.

## New Aid For Blind

"Electric Eye" Enables Them To Read Ordinary Print

An announcement says Prof. A. G. Goldman of the Soviet Ukraine had invented an "electric eye" by means of which the blind with their fingers would be able to read ordinary printed books.

An apparatus equipped with lenses, moves over print and projects images of letters onto a photo-electric cell, he explained. The cell changes the images into electric impulses which cause vibrations on a special desk designed for this purpose.

## New Machine Perfected

Can Determine Centre Of Gravity Of Human Body

A machine which can determine the centre of gravity of the human body has been designed and built in New South Wales at the Melbourne University.

The machine was described and demonstrated before the physiological section of the Science Congress in Melbourne by Prof. Osborne and Dr. H. Paul, who perfected it.

heavy, it is so sensitive that a weight of one-third of an ounce placed one foot from its centre will disturb the balance. Disturbance of the centre of gravity in certain diseases may be determined by the machine.

## Istanbul Solves Problem

Pedestrians And Vehicles Have Been Assigned Different Streets

Pedestrians of Istanbul, Turkey, have been assigned streets for their exclusive use while automobiles and horse-drawn vehicles have been given sole rights on others. One-way streets also are being tried. Traffic lights were used for awhile and rejected. The city has a real traffic problem in the congestion of its narrow and winding lanes.

## Aversion Overcome

The Hong Kong Press says the Chinese aversion to Western medical treatment, especially to surgery, is now practically overcome, and one does not meet it except in the case of very ignorant people. The battle has been assigned streets for their exclusive use while automobiles and horse-drawn vehicles have been given sole rights on others. One-way streets also are being tried. Traffic lights were used for awhile and rejected. The city has a real traffic problem in the congestion of its narrow and winding lanes.

Useful Work Too

J. B. Priestly tells a good story in his "English Journey," heard in Lancashire. A woman-wreaver lost her lazy husband, and a neighbor asked her where she would bury him. "Ah! not 'gin' to bury 'im." "What yer 'gin' to do with 'im?" "Ah! 'gin' to 'ave 'im cremated." "What 'gin' to do with 'is ashes?" "Ah! 'gin' to put 'em in an egg-timer. 'E wouldn't work when 'e was alive, 'e 'ave to work when 'e is dead."

Heartbeats of animals is winter heartbeat drop as low as 10 to 16 per minute, whereas normally they average between 100 and 200.

## ARE YOU WEAK?

Mr. W. B. Bennett of 10 Wheeler Ave., Glouster, Ont., said: "I had lost weight through loss of appetite. I felt backache and tired. I had been taking Dr. Harvey's Kidney Pills. I discovered my weakness was not due to lack of food, but to kidney trouble. I am now feeling better and my appetite is returning."

All druggists. New size, tablets 10 c. each. Write Dr. Harvey's Clinic, Buffalo, N. Y., for free medical advice.

## Little Journeys In Science

GASOLINE (By Gordon H. Guest, M.A.)

Gasoline consists of a mixture of liquid compounds known as hydrocarbons. The use of gasoline as a source of power in engines is due to the fact that the gasoline is easily changed to a vapour and that a mixture of gasoline vapour and air, when ignited, burns instantaneously, or, as commonly expressed, explodes. The mixture of gasoline vapour and air is led into the cylinder of the engine where it is ignited by an electric spark.

The "ethyl gasoline" which is now used so widely, is gasoline to which has been added a small amount of two colorless liquid compounds known as lead tetraethyl and ethylene bromide. The lead tetraethyl prevents the "knocking" of the engine when the engine is under high pressure; the reason for this is as yet not known with certainty. The use of the lead compound alone causes lead to be set free during the reaction, and as a result the ignition points of the spark plugs become clogged. When ethylene bromide is added, the lead combines with the bromine which is present in the bromine, producing the volatile lead bromide which escapes in the exhaust.

In former days kerosene was the most important product obtained from crude oil. To-day, however, gasoline is by far the most valuable of these products and hence scientists have put forth every effort to increase the yield. This is done by distilling kerosene and similar oils at high temperatures under pressure. This process is known as the "cracking" of oils. The average crude oil from the large producing areas of Texas and Oklahoma contains about 30% gasoline. Modern improvements in the cracking process have enabled oil refiners to increase the gasoline yield to 70% of the crude oil or higher, depending on the nature and quality of the gasoline which is desired.

Recent experiments have shown that the gas hydrogen under high pressure changes powdered coal suspended in hot oil into lubricating oil, gasoline, and similar products. The cracking process has become exhausted this process may supply man with these products so necessary to our modern civilization.

## Seeding Soy Beans

Experimental Farm Official Gives Ideas On Best Method

Soybeans may be drilled soil, like small grains, or seeded in cultivated rows, usually 28 inches apart. The grain drill can be used for both methods and some vibrations on a special desk designed for this purpose.

Drilled seeding has generally resulted in slightly higher yields of both hay and seed than from row planting, but the latter method of seeding is usually recommended, especially for new growers. In the first place, soybeans start very slowly, and unless the land is exceptionally clean, the crop is liable to be crowded out by weeds. Row seeding allows cultivation, and weeds can be kept down to a large extent by this means. Where the crop is grown for seed, row seeding results in better and more even maturity and somewhat plumper grain. Drill seeding on the other hand produces a finer quality of hay which cures more easily than hay produced in spaced rows.

The amount of seed required to plant an acre depends to some extent upon the variety, as soybean seed varies somewhat in size, according to the variety. In general, however, row seeding will require from 30 to 45 pounds of seed per acre, while drilled seeding will require 90 to 120 pounds of seed per acre. The drill should be regulated to drop the seed about 2 to 3 inches apart in row planting, and 2 to 3 inches apart where drilled soil.

The time of seeding will vary somewhat according to locality and conditions. At Ottawa, seeding about the middle of May has been found very satisfactory.

## Penalty For Stealing

Century Ago Boy In Nova Scotia Had Ears Clipped

There was a time if a man stole a loaf of bread he was sentenced to the galleys, but a little more than a century ago there was a lad in St. Anne's, Cape Breton, who confessed to stealing some money and had one of his ears clipped as the penalty.

The parents of the boy, rather than send him to Sydney for trial, dispatched their son to a meeting of local school trustees attended by Magistrate Norman MacLeod, colorful figure in Nova Scotia history. The magistrate and the officials were to determine the punishment.

After "short deliberation among these individuals they concluded that rather than the boy should be sent to Sydney and there confined at severe season of the year and finally undergo punishment of the law for the offence it would be less severe punishment to cut off a small part of one of his ears."

This was revealed in an old document, an official report of the occurrence, unearthed by Prof. D. C. Harvey, provincial archivist.

The first sheep brought to America came to Capt. John Smith's Virginia colony about 1609.

It takes about 30 gallons of maple sap containing three per cent. sugar to make a gallon of syrup.

Minerals are being studied to get the tonnage for the Alaska Railroad.

## Lazy Leaf Basking in the Sun!

—But it "gets its day's work done" that way—storing up fragrance and flavour for Ogden's Fine Cut. When you "roll your own," with this famous cigarette tobacco, you will realize how much selected, sun-ripened leaves do to make every puff more enjoyable. Of course you'll use the best papers—"Chanticleer" or "Vogue"—the choice of discriminating men who "roll their own."

## Educational Holiday

Canadian School Boys To Have Trip To Old Land

Giving an educational holiday for boys from 12 to 19 years, an escorted Canadian school boys party will sail from Montreal on July 5 for a 44-day trip through England and Scotland.

In charge of the party will be Arthur N. Snodgrass and J. W. Perks, B.A., school principals of Montreal.

Western bookings for the boys' trip are being made by the Canadian National Railways, while the ocean voyage is being cared for by the Cunard White Star, Limited, and the Anchor-Donaldson Lines.

The trip has been an annual event for some years for eastern Canadian boys, but this year the bookings are being extended to the west.

## May Try Another Trip

Wilkins To Build Sub-Ice Boat For Arctic Voyage

Undaunted by failure in 1931 to penetrate the Arctic by submarine, bearded Sir Hubert Wilkins said he was ready to begin construction of a special sub-ice craft for another attempt.

Arriving at Miami, Florida, from Lima, Peru, by Pan-American Airways, Sir Hubert said the proposed undersea boat would be "very simple."

"The adventure of the Nautilus taught me," he said, "to leave off everything that was not absolutely necessary."

The City of Lima, Peru, celebrated its four hundredth birthday January 18.

Approximately 20 per cent. of all school children under the age of 20 have defective sight.

The packing industry has by research developed about 140 by-products, mostly from parts of the animals that used to be considered waste.

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take GIN PILLS for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly.

CHIEF MacDonald gives notice that Dog tags are now on sale at the Town Office and all owners of dogs should have their dogs registered before May 15th. After that date untagged dogs will be impounded.

Mr. Harry Halpin has been appointed as agent here for Remington-Rand typewriters and supplies. See me for new or re-built typewriters, carbon papers, ribbon copy paper, etc. See the new portables. Terms from \$4 a month.

### RIMBEY NEWS

Mrs. E. George was the guest of honor at a bridge held at her home on Wednesday evening, April 24th. Several tables were in play, the honors for high score going to Mrs. E. Stoles. During the course of the evening, Mrs. George was presented with an electric hot plate by the ladies as a slight token of their regard and in remembrance of her many years in Rimby. Mrs. George and two children are leaving shortly for Lacombe. Mr. George has accepted a position with Laird Motors.

About a dozen of Rimby's young people have organized a string orchestra under the able leadership of Mr. O. H. Boyton, barister. This is the first attempt along such musical lines for Rimby and it is greatly appreciated by parents and townspeople alike.

Mrs. W. W. Rogers will speak in the Rimby Hall on Friday evening on Social Credit.

Another winter has passed without any loss from fire in the town of Rimby. Twelve successive years with but one small blaze which was easily controlled by hand extinguishers is a record. During the winter of 1922-23 however, losses from fire were estimated at \$100,000.

Many farmers are on the land, digging, haying and ploughing. The earliest work was done on the 22nd. Seeding will not be starting for at least another week. Roads are drying rapidly and cars and freight trucks are coming through from the main highway every day.

Dancing and cards provided entertainment for the large crowd which gathered in the Rimby Town Hall on Thursday evening to bid farewell to one of Rimby's popular couples, Mr. and Mrs. Fred Marriott. Mr.

Marriott, who has been the agent for the Alberta Pacific Grain Company in Rimby since Christmas of 1922, has been transferred to Kathryn, Alberta and he and Mrs. Marriott left on Friday morning for their new home.

Miss Clara Byers is spending a few weeks in Ladue as guest of her brother Mr. George E. Byers and Mrs. Byers.

Mr. Milton Martin and Mr. Neil D. MacLean, of Edmonton, spent a few hours in Rimby on Monday.

Mrs. J. H. Bealey is a patient in St. Paul's Hospital in Rimby since Wednesday.

The many friends of Mrs. Fairbrother will be pleased to know that she has returned to Rimby after having spent the winter months in Edmonton.

Miss Pauline, the young daughter of Mr. and Mrs. Wm. Broderston, of Leedale is receiving medical treatment in St. Paul's hospital.

Miss Viola Ellis of the Delburne public school staff spent part of the Easter holiday season in Rimby. The Rosedale U.F.W.A. met at the home of Mrs. S. M. Auger, when Mrs. P. Alter was hostess. Fifteen ladies were present and answered roll call with "do, say, or pray." An impromptu musical program presented by Miss Estel Stuart, Miss P. Alter, Miss Edith Sturgeon and Mrs. S. McIlroy.

The ladies voted to present the layette which they recently completed to the baby's ward of the Rimby Hospital.

The May meeting will be held at the home of Mrs. Robert McKenzie and it is expected that Miss Margaret Archibald of near Ponoka will give a talk on C.C.F. on that occasion.

Feeder pigs wanted. A Gilmore.

HAROLD W. VERMILYEA  
HANGED TODAY

Belleville, Ont., May 1.—Harold W. Vermilyea, convicted of the axe slaying of his mother in Belleville, last October, was hanged at 1:12 o'clock P.M. Thursday morning.

HARASSED NEGRO OUT OF LUCK

Windsor, Ont., May 1.—Every-thing went wrong for Henry Brown, 35-year-old negro, in magistrate's court today, charged with theft of a toilet tank. First he denied he had anything to do with stealing the tank from a vacant house, but when shown fingerprints on the tank that corresponded to those of his own, he confessed to the theft.

Later he pleaded for a "chance" because he had an offer of a job from "Mr. Tison, the undertaker." Crown Attorney James S. Allen nullified the plea by pointing out that Mr. Tison had been dead several years. Brown was remanded a week for sentence.

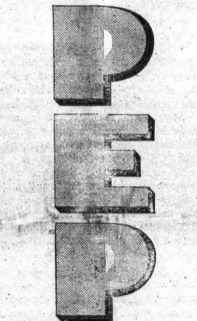

C.P.R. OFFERS SPECIAL FARES FOR KING'S JUBILEE

As May 6th has been declared a National Holiday in recognition of the King's Silver Jubilee, special low fares on Canadian Pacific will apply over the week-end for travel between all stations, it was announced by Mr. G. T. Jackson, Ticket Agent. For those who intend to take advantage of what promises to be one of the most popular week-ends of the season, tickets will be sold good going from Friday, May 3rd, to and including 2 p.m. Monday, May 6th, with return limit until Tuesday, May 7th.

Feeder pigs wanted. A Gilmour.

The business owned by S. M. Murray has been sold to C. D. Williamson, whose "advertisement" will be found elsewhere in this issue under the name of the Owl Economy Store.

TENDERS FOR COAL

SEALED Tenders addressed to the undersigned and endorsed "Tender for Coal," will be received until 12 o'clock noon (daylight savings), Tuesday, May 15, 1935, for the supply of coal for the Dominion Buildings and Experimental Farms and Stations, throughout the Province of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from the Purchasing Agent, Department of Public Works, Ottawa; the District Resident Architect, Winnipeg, Man.; the District Resident Architect, Regina, Sask.; the District Resident Architect, Calgary, Alta.; and the District Resident Architect, Vancouver, B.C.

Tenders will not be considered unless made on the form supplied by the Department and in accordance with departmental specifications and conditions.

The right to demand from the successful tenderer a deposit, not exceeding 10 per cent. of the amount of the tender, to secure the proper fulfillment of the contract, is reserved.

By order,  
N. DESJARDINS,  
Secretary,  
Department of Public Works,  
Ottawa, April 15, 1935

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act" under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Post Office in the town of Lacombe in the Province of Alberta, on

SATURDAY, the 11th May, 1935 at the hour of 2:30 o'clock in the afternoon, the following property, namely:

The South East quarter of Section 25 in Township 41, Range 25, West of the 4th Meridian, containing by admeasurement 160 acres, more or less, and subject to the reservations and provisions contained in the Patent from the Crown, excepting thereout all mines, minerals, gas, petroleum and valuable stone.

Terms of sale to be ten per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save taxes for the current year. The vendor is informed that the above property is situated about 14 miles from the town of Lacombe at which point is the nearest Post Office. The nearest grain elevator is at Gull Lake, 6 1/2 miles distant from the property, and the nearest school is one-half mile distant from the property.

The land contains 160 acres of which 110 acres are under cultivation. There are approximately 60 acres of brush and 30 acres of land wooded to browse. As of the property could be cultivated if cleared. The soil is a black loam, part chocolate, six inches to two feet deep, with clay subsoil. There is a drilled well on the property.

The property is all fenced, and 3-4 of a mile is cross fenced, with 2 and 3 strands of barbed wire, and poplar and tamarac posts.

Buildings on the property are:

1 frame dwelling with shingle roof, 24x36.  
1 frame barn with shingle roof, 20 x 30.  
1 frame hen house, board roof, 12 x 12.  
1 frame hog house, board roof, 12 x 20.  
1 frame and slab granary, board roof, 12 x 16.  
1 frame well house, no roof.

For further particulars and conditions of sale, apply to Messrs. Nowell, Lindsay, Emery & Ford, Barristers, Canada Permanent Building, Edmonton.

Dated at Edmonton, in the Province of Alberta, this 3rd day of April A.D. 1935.  
Approved "A. T. Kinnaird," Dep. Registrar.

Canada's Greatest Problem

The Canadian people are confronted with a gigantic problem. We say the Canadian people advisedly because, while governments, Federal, Provincial and Municipal are all struggling with it, the problem is one towards the solution of which individual citizens must make their contribution. The fact that it is a problem facing all other nations offers no consolation because the more acute and difficult it is in other lands only serves to make it more difficult in Canada.

The problem can be stated in two or three words—unemployment and relief.

The unemployed man or woman wants work and the wages which work will bring to them. Failing work and wages, they must be provided by Governments with the necessities of life—food, clothing, fuel and shelter. Such necessities can, of course, be provided by the State through the taxation of those other men and women who are employed, or still have some savings accumulated throughout the years of the past in order to make provision for their own future and old age. The only other way is for Governments to borrow money and add such borrowings to their public debts upon which interest must be paid through increased taxation, and the principal sum of which is passed on as a liability for future generations to meet.

So far as municipalities, with their small and limited sources of revenue, are concerned, many have reached the limit of what their taxpayers are able to pay in order to care for those who are unemployed. Further taxation simply means that more people will be unable to pay it, and, failing to do so, will lose what they still have and will, in turn, be forced "on relief." Faced with this situation, a largely attended conference of the mayors of the leading cities and towns of Canada unanimously declared the inability of the municipalities to any longer carry their share of the relief burden and called upon the Federal Government to assume it in its entirety.

On their part, the Provinces—and more particularly the Western Provinces, which, in addition to the general and world-wide economic depression, have suffered more severely than other portions of the Dominion because of successive years of crop failures owing to the unprecedented drought conditions which have prevailed—now find it impossible to raise, either by taxation or borrowings, the Provincial share of relief expenditures and at the same time assume the share of the municipalities.

It must be recognized, therefore—the truth cannot be ignored—that the problem is a national one, and one that most intimately concerns every Canadian citizen and every Canadian interest. This must now be accepted as a fact even though under the constitution of this country the responsibility of making provision for people in need is primarily a municipal responsibility. That is, the actual facts of the situation override all constitutional aspects.

Then, there is the other side of the picture. Tens of thousands of people who are "on relief" complain that the amounts allotted to them are inadequate to their needs and desires. They are insistent in their demands that relief allowances be substantially increased. They are organizing to enforce their demands, and all over the country communitarian agitators are playing upon their distress and worries and arousing their passions and making demands which it is manifestly impossible for the remainder of the people to satisfy.

These agitators all loudly object to people on relief being asked to render any service whatever in return for the payments being regularly made to them. They insist that no person should be called upon by the municipality in which they reside to perform any work in return for the assistance extended to them. They refuse to recognize that, in effect, people are being paid what is tantamount to wages in advance, small though they may be, by their other fellow citizens, and they declare that to ask relief recipients to render any service in return for such assistance is to make "slaves" of them.

Yet Canadians worthy of the name, and knowing their country's difficulties, should be grateful for what is being done in their behalf, and if there is any manhood left in them they should not only be ready and willing, but actually anxious, to make what return they can for the fellow citizens and their country. These agitators demand work—not for themselves but for those they would make their dupes—and when work in its usually accepted meaning cannot be provided but State assistance is extended, they then advocate refusal to work in exchange for such assistance, or even for a small fraction of it. Why? Because they are out to destroy the very institutions of government and the very people who are now providing the unemployed with the necessities of life.

Such is the major Canadian problem of to-day. It is one, let it be repeated and emphasized, that vitally affects every citizen. It is their problem; what they are going to do about it?

We submit that the citizen who is employed, or has an income, or some reserves, should pay his taxes uncompromisingly, willingly and promptly and thus assist his country in a time of great difficulty. More, he should make every effort to provide a little work, no matter how small or temporary the job may be, for some one out of work, and thus relieve the pressure.

We submit further that all persons on relief should be reasonable in their demands, should endeavor to get along with as little as possible, rather than demand more. And they should show their manhood and self-respect by willingly, and at all times, rendering such service in return to their fellow citizens as it may be in their power to render.

This is no time to "rock the boat," and any person who seeks to do so is not a true Canadian, but has an ulterior motive to serve, and may well be described as an enemy of the country.

## Waste In Lightning Flashes

Scientist Believes Means Will Be Found To Harness Energy

Dr. D. C. Rose of the division of physics and engineering of the National Research Council, has a word for those who are afraid of thunderstorms. A person's chances of being killed by some hazard of civilized life, he says, are about 10 times as great as the chance of being killed by lightning.

Dr. Rose believes it possible that within the next few generations some means will be found whereby man can harness the enormous electrical energy of the atmosphere that is now dissipated in thunderstorms. He says it is estimated about 100 days of lightning a second occur throughout the world which means a continuous waste of about 2,000,000,000 horsepower.

The scientist explained the danger of death from lightning was considerably greater in the tropics than in temperate countries such as Canada. He said there had been little improvement in recent years in protection against atmospheric electricity and that the old-fashioned lightning rod is still about as effective as anything.

## Germany's Air Force

Hitler Reports It Is Numerically Stronger Than Britain's

The London Daily Mail said Adolf Hitler had informed Sir John Simon, British foreign secretary, that Germany already has an air force numerically stronger than Great Britain's.

The Daily Mail did not reveal the source of its information but it was known Simon returned from Berlin with documents presented to him by Hitler in which, it is understood, Dr. Goebbels frankly revealed the extent of Germany's armaments in the air.

The disclosure of Germany's air strength was reported to have caused grave concern to the British cabinet. Ministers held several informal meetings for preliminary discussion on what is expected to be a "showdown" debate on the entire German situation when Capt. Anthony Eden, lord privy seal, returns from a swing through European capitals.

## Gift For King George

Ruler Of Tonga Gives Ancient Turtle With History

King George is to be presented a three-hundred-year-old turtle with a history when Queen Salote, the six-foot-three ruler of Tonga, arrives in London for preliminary discussion on what is expected to be a "showdown" debate on the entire German situation when Capt. Anthony Eden, lord privy seal, returns from a swing through European capitals.

The Friendly Islands, the name by which they have been known ever since, Captain Cook had a turtle, then 160 years old, on board, instead as a present for George III. He gave it as a peace offering to King Tubou, of Tonga. Queen Salote, his descendant, inherited the turtle.

## Soil Of Six Colors

Earth Like Rainbow Found On Hillside In Natal

A "Rainbow Hill," the soil of which is composed of six bright colors, has been found at Ladysmith, Natal.

Farmers who want to paint their homes now collect some of the clay, which is dried, powdered, and later mixed with water or oil. They can choose from red, pink, cream, green, brown and yellow. Almost every stone in the vicinity is dyed blood-red and looks as if it had been coated with red oil paint.

## Total Pension Payments

Secretary Of State Gives Amounts Paid During Year

Amounts paid by the Dominion government for pensions during the last fiscal year, according to an answer tabled in the House of Commons by Secretary of State C. H. Cahoon, were:

Old age pensions, \$12,313,594; Soldiers' pensions, \$41,839,830; civil servants' pensions, \$5,612,932; judges' pensions, \$276,930, and "all other" pensions, \$237,322.

The reply was made in answer to H. E. Spencer (U.F.A., Battle River).

## Ready For Maiden Voyage

The new French ship, Normandie, rival to the Queen Mary, as the world's largest liner, will leave the shipyards at Saint Nazaire, France, April 20 for Le Havre. From there it will make its maiden voyage to New York.

It is estimated that Negroes in the United States have an annual purchasing power of two million dollars.

Aluminum finished by a new process is greatly increased in its reflecting properties.

One trip to Europe is enough. It enables you to say, "The last time I crossed."

Nearly one-fourth of Holland is below sea-level.

## HER ARMS AND LEGS IMMOVABLE

### Ten Years With Rheumatism

To this woman it must have been like commencing to live a new life, when she began to use her arms and legs again, after they had been helpless for ten years.

"I suffered with rheumatism," she writes, "and had been bedridden since 1920. I could not move arms or legs, and had to be fed like a child. Everybody thought I should be an invalid all my life. I forced myself to fight against it, and tried a number of different things. It was Kruschen that eventually saved me, and to-day I consider it is saving my life. My condition has greatly improved and my limbs are gradually becoming more supple. Already I can eat without assistance, and dress myself—which I had not done for ten years."

Two of the ingredients of Kruschen Salts are the most effective solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uric acid needles through the natural channels.

## Cling To Superstitions

Chinese Villagers Beat Magistrate For Condemning Idol

Incredible China, with its strange blending of races and religions, has chalked up another victory for the medieval over the modern.

More than 3,000 citizens of the little inland community of Hauschow, have risen in arms and crushed their leader—because he sought to abolish one of their ancient superstitions.

For more years than anyone can recall, Hauschow was worshipped as the God, in an ugly idol which resided in a special temple in the heart of the city.

When hunger came the god was angry. Pestilence meant that he was riled for sure. But when the rains came and the rice filled every stomach, at regular intervals, the Town God was pleased and everybody was happy.

Now the Sikwan magistrate realized that it is hard to maintain order, hard to improve the lot of a people so strangely obsessed. He ordered the god destroyed.

Merchants deserted their dusty shops and farmers trekked in from the fields. There was a mass meeting in the Town God Temple.

The mob of 3,000 marched on the magistrate's home, beat and stoned him, and carried off his furniture. But the intervention of a group of Peace Preservation men, the magistrate would have been slain.

## Smuggling Still Rampant

U.S. Trying To Stop Flow Of Contraband Food Stuffs From Canada

The United States border patrol has asked for more strength with which to fight its "union war," as customs and immigration officials sought to check the flow of smuggled foodstuffs from Canada.

John L. Zurbick, district director of immigration, announced he had requested the addition of 50 agents to his staff, and had asked for additional speed boats and automobiles with which to patrol the international boundary.

Speedsters are plying the Detroit river from Port Huron to Toledo, a racket as extensive as the liquor running of pre-war days, he declared. Instead of liquor, the smugglers have turned to onions, butter and other foodstuffs on which prices are lower in Canada than in the United States, and on which duty is high.

## A Native Of Asia

The parsnip that is used here is a native of Asia and Europe. We have what are called Wild Parsnips in Canada, but they are poisonous. The parsnip differs from carrots and all other vegetables in being greatly improved in taste by being left in the ground all winter in the field in which it is grown. The winter's frost seems to give it relish. But it will not keep long after being dug. It is a splendid vegetable for fattening sheep and oxen. It gives to mutton and to beef a superior flavour. The last half of March and the first ten days of April are the best for spring parsnips.

## Irish Goat For Gotham

During the year 1934 the United States purchased an animal from the Irish Free State. This is solemnly recorded in the shipment returns as "Cork to New York—one goat."

Holland's Noord Zee Canal has navigation locks bigger even than those of the Panama Canal.

## Out-Doing Jules Verne

English Winter Forces Passenger Rocket Doing 14,000 M.P.H.

Jules Verne, who thrilled a former generation by flights of fancy into the future, and even H. G. Wells, with his tales of the planets, are outdone by Chaires G. Philp in a book about the "Stratosphere and Rocket Flight," just published.

He prophesies as of "not far distant date" passenger rocket airplanes capable of doing 14,000 miles per hour and of crossing the Atlantic eventually, in even faster planes, in 60 seconds.

Passengers, it appears, will be reasonably comfortable. They will lie down hermetically sealed in hammocks. Special measures are taken to counteract trouble with breathing.

When the rocket plane approaches its destination, retarding rockets check its heading drive. Mr. Philp's description of the flight makes one itch to take a rocket—for one's most detested neighbor.

Mr. Philp tells us that plans of the first passenger carrying rocket yet devised have been acquired by the German War Ministry. A 24-foot projectile, built after these plans, carried a passenger 30 miles into the air, two years ago, and landed him safely after 10½ minutes.

Other wonders predicted by Mr. Philp are an artillery shell, with a 500-mile range, directed by radio; and bomber planes cruising 30 miles above the earth and swooping towards their targets at 3,000 miles per hour.

## Long Distance Record

Telephone Call From Limer Covered Distance Of 17,887 Miles

Sir Julian Cain, noted British cricketer, captain who took a British eleven to the United States and Canada 18 months ago, holds the world's record for long distance telephoning.

Sir Julian's record, said wireless telegraph operators of the Canadian Pacific liner, Empress of Britain when the world cruise ship arrived at Hong Kong recently, was made two weeks before when the ship was at sea between Singapore, Straits Settlements, and Bangkok.

Atmospherics prevented the reception of a call from the Empress of Britain to Nottingham, England, by the London receiving terminal. But the call was successfully completed by routing it direct from the ship to New York, and by beam wireless to England.

At the time Sir Julian talked he was seven hours ahead of London time. The San Francisco control station was nine hours behind London and New York. Of course, three hours ahead of the Pacific station. Rough computation shows a distance of 17,887 miles for the conversation between the Empress of Britain and London off which 9,275 miles is a direct connection by the ship and San Francisco. Direct, the voice would have travelled, only 7,500 miles.

## Records Made Years Ago

Carry Voice Of Jenny Lind But Not Cause To Be Forgotten

Somewhere in Sweden or Denmark the "voice" of Jenny Lind, the Swedish nightingale is believed to lie forgotten. Possibly it is in an attic or a storehouse. The famous singer, it has been revealed, made records in Paris in 1857, shortly after the first phonograph was put on the market.

The records were of the old cylinder type. After Jenny Lind's death, it is believed, they were sent either to Stockholm or Copenhagen. A Swedish newspaper is appealing to its readers to search their attics, old trunks and boxes in case they may possess the precious records without knowing it.

## Boy Seems Unlucky

Thinks Eleven Accidents In Nine Years Too Many

Nine-year-old Victor Holmes of Penduberry, Scotland, thinks 11 accidents in nine years too many. He is recovering from No. 11, which was upsetting boiling water on his legs. Victor has been saved from drowning three times, has been bitten by a dog, burned by blazing carbide, and has dislocated his elbow and become entangled in the spokes of a cart wheel.

## Sure Of His Figures

A sugar planter in Hawaii took a friend from the States to the edge of a volcano. "That crater is 70,004 years old," he explained.

"How do you get the exact age?" asked the newcomer. "I can understand the 70,000, but how do you calculate the four?"

"Well, I have been here in the islands for four years and when I arrived I was told that crater was 70,000 years old.

One of the first steps to contentment and happiness is to learn not to begrudge other people the things they have because you cannot have them.

Japan's rice crop last year was 26.8 per cent. below that of 1933.

## Delving Into The Past To Piece Together The Story Of The Lost People Of England

Little by little, the patient toil of the archaeologist is piecing together the strange story of the lost peoples of England. How they lived and worked; their dwellings; the gods they worshipped in those far off days when Rome was young—slowly, these things are again emerging into the light.

Yet it is a story with many missing chapters still. Here and there, hard by some mysterious monolith or earthenwork, excavations reveal concrete evidence of a civilization that grew and died centuries before recorded history. But who the peoples were, how and why they disappeared, no man can say with any certainty.

Almost half-way in the train journey between Plymouth and London, the Canadian visitor will note hillside scarred with what appear to be the irregular lines of old enclosures. Round the hills they run, interconnecting in obvious designs. Occasionally, earthenworks rise above plain and rising land. Stone circles add their touch of mystery. They are part of a great system linked by green roads which traversed England from sea to sea long before Britain heard the transport of Roman legions or the first Celtic crossed the narrow sea from Gaul.

Who dwell there and why were these great earthworks needed? The usual explanation is that they were built for defence. But defence against whom? The Romans, it is said, built Maiden Castle in Dorset over five miles. What peoples in those dim days could have needed such elaborate defence? What peoples were so numerous as to hope to carry them by assault?

Dr. E. M. Wheeler, who has been conducting excavations at Maiden Castle, says that the multiple defences there imply a large population. In one pit, more than 4,000 sling stones were found. There were long weights cut from chalk, innumerable bone arrowheads, even a piece of carbonized wheat bread.

Who were these people who came and went and left no history? Archaeology has many theories but so far no concrete fact.

They are the lost peoples of England.

### Depends Largely On Health

No Hard And Fast Rule For Reaching Century Mark

These centenarians get more confusing every day.

A woman in Mitchell, Ontario, who is 101 rises at half past four every morning and attributes her long life to early rising.

No doubt she goes to bed early and has her eight hours, but what's the use of living to 100 if one goes to bed early in the evening and gets up in the middle of the night?

Another centenarian will say that the secret of long life is to not get up early.

One will say that long life is only attained by total abstinence and no smoking. Yet there are plenty of centenarians who will claim that a "nightcap" and plenty of good tobacco kept them in perfect health.

So there can be no hard and fast rule for reaching the 100th year. What suits one person does not suit another. If total abstinence from alcohol and tobacco are the secrets, then there are thousands of people in Ontario who ought to live to 100 but won't.

Largely it depends primarily on a sound constitution, moderation in eating and drinking, and freedom from worry and anxiety—St. Thomas Times-Journal.

Colors Affect Fish

Large Number Have Weakness For Red And Yellow

Fish are extremely sensitive to color and most of them have a weakness for reds and yellows, according to John Berry, research officer to the Avon Biological Survey.

Berry has been carrying out experiments to determine whether a barrage of colored lights might be effective in keeping vermin fish away from the spawning grounds of salmon and other fish appreciated by anglers.

He found that dark blue was the most powerful deterrent to fish while green was a deterrent to gudgeon. Greenish blue proved successful with miller's thumbs, while other fish found plain green decidedly annoying. Red, orange and yellow lights attracted most fish.

Germany Discards Time Clock

Punching the clock when reporting for work is being abolished in Germany as a system that is "contrary to the spirit of the new era and the honor of the laborer." It is being replaced with a joint assembly between worker and employer.

In chemical composition, a synthetic ruby is the same as a real one.

### For A Sugar Beet Refinery

Manitoba Government Would Lead Support To New Enterprise

The Manitoba legislature passed a resolution enabling the government to introduce a bill authorizing the administration to guarantee to the extent of \$600,000 the securities of any company planning to build and operate a \$2,000,000 sugar beet refinery in the province.

Hon. J. S. McDermid, minister of lands and mines, pointed out there was no definite deal in mind at present but he declared the legislation might induce private enterprise to provide a plant that would be of great benefit to farmers in the province. The resolution was heatedly debated.

Giving employment to 130 men, the Manitoba Paper Company will resume operations of its plant at Pine Falls, Man., 70 miles northeast of Winnipeg, in the fall, Mr. McDermid announced.

### Further Use For Insulin

Is Now Found Beneficial For Underweight Children

The use of insulin as a stimulant to the appetite, particularly for underweight children, was recommended to the California Medical Association by Dr. E. K. Kost Shelton.

The famed hormone, developed originally at Toronto for the treatment of diabetes, by Sir Frederick Banting and Dr. C. H. Best, also has proven valuable, Dr. Shelton reported, in combatting a wide range of human ailments.

"From the intelligent application of insulin," he stated, "benefit can be secured for persons suffering from tuberculosis, mental difficulties, narcotic addiction, the various types of anaemia and kidney and other disorders."

In the treatment of underweight persons, Dr. Shelton said, insulin produces an increased appetite.

### Beats Previous Peak Year

World Record Set By British Industries During 1934

Britain reached its all-time peak of industrial activity during the past year, it is revealed by a survey of the Board of Trade Journal.

In manufacturing industries even the previous peak year of 1929 was beaten by a comfortable margin. Notwithstanding the greatest strides in 1934, followed by iron and steel, mines and quarries, gas and electricity, engineering and shipbuilding and textiles.

The survey showed Britain led the world in building activity, with Italy a poor second.

The United Kingdom's national accounts for the financial year ended April 1 showed a surplus of \$7,562,000 (approximately \$36,300,000).

### Play Too Rough

Mayor Of Dublin Not Impressed With The Way Hockey Is Played Here

Canadians play too rough, says the lord mayor of Dublin, Ireland, Dr. Hon. Alfred Byrne.

Visiting Toronto, the lord mayor expressed the opinion that what is needed on this side of the Atlantic is a little less fight and a little more respect for the rules of the game.

"Why," he said, "I saw two fellows clouting each other in an ice hockey match, and they were only penalized two minutes each. Over in Ireland that wouldn't be tolerated."

All the rough stuff has been ironed out of Hurley and Gaelic football, he said. "If one man struck another, he'd be put off for life."

### Making Use Of Truncheons

Germany Turning Rubber Cudgels Of Police Into Motor Tires

The rubber truncheons carried by German police are being turned into motor tires.

The Prussian police, soon after General Goering's Premier of Prussia, were relieved of their rubber truncheons, which have since been lying in store. The current campaign to increase Germany's self-dependence and to reduce imports of raw materials by stimulating the production of German substitutes and regenerating textile, metal and rubber waste, has again attracted attention to them. An order has now been given that the whole stock of truncheons is immediately to be used in this way.

New Signalling System

A new signalling system, with photo-electric "eye" apparatus and lookout screens for signal boxes, is being considered in London for the four main-line railways. Trains miles away will be made visible on the screens in thick fog or darkness, and signalsmen will be able to "look in" at approaching traffic. All four main groups may be converted to the new system in three years.

Bees that cannot see the color red can, however, see a blue ultraviolet end of the spectrum invisible to man.

First Trump—What would you do if you won the Irish Sweep?

Second Trump—I should have all my socks upstairs.

"Fancy having to wait for his wife to come home to get some money?"—Schus in Everybody's Weekly, London.

### Rust Resistant Wheat

National Research Council Reports That Success Attends Efforts

Indications of success in the search for rust resistant wheat were reported to the National Research Council in continued deliberations at Winnipeg.

Of 19 new varieties of rust resistant wheats developed by Canadian plant breeders, 15 have given higher yields than Marquis, 15 ripened earlier than Marquis and at least eight varieties were considered satisfactory in milling and baking quality, reports stated by the committee disclosed.

The eight most satisfactory varieties will be multiplied as rapidly as possible for further tests, it was decided. Fifty bushels of one variety are already available. Tests of other varieties will be continued as well.

The tests made in 1934 involved nearly 2,000 plots at 13 plants in the prairie provinces and more than 4,000 milling and baking tests were made. Weight per bushel, protein content, carotene content, loaf volume, crumb texture and crumb color were among the tests. The 1935 tests will include semi-commercial milling and baking tests in the United States and Europe.

### Jubilee Radio Program

Special Broadcast On May 6 Will Carry Message From His Majesty

The Canadian radio community has announced it will broadcast a special program May 6, the 25th anniversary of King George's accession, lasting most of the day.

The program will include a message from the King broadcast from London. A thanksgiving service from St. Paul's cathedral, which Their Majesties will attend, ceremonies on Ottawa's Parliament Hill and formal messages from heads of governments throughout the Empire.

## The SNAPSHOT GUILD

### SPRING LIGHTNING

Lightning and moonlight pictures are unusual and fascinating and you can take them with any kind of a camera.

April showers not only bring May flowers but night-time electrical storms as well. And there's your chance for sensational lightning pictures.

With the dark, clouded skies the sharp ribbons of lightning spread in fantastic, fascinating flashes and when caught by the camera, the resulting picture is really something to talk about and adds variety and interest to your snapshot album.

There is no trick involved in taking lightning pictures. In fact, it's quite simple. If it is raining during the time the lightning is weaving its webs of flashes across the sky, and you don't want to get wet, take your pictures from the inside through an open window. Place the camera on a tripod or something solid at an open window and point it in the direction of the last few flashes. Set your shutter at "time," using the largest diaphragm opening or "stop." You may close the shutter after the first flash or leave it open for the registering of several flashes. Of course, if you leave the shutter open for many flashes, you will get a fantastic conglomeration of ribbons of light but not a true picture of a single flash. However, it will be unusual, to say the least, and well worth adding to your collection of "snaps."

If it is an honest-to-goodness storm, it will pay you in self-satisfaction to take several pictures, for the more brilliant the flashes and the more ribbons of light signifying the dark storm, the greater the chances for a really spectacular picture.

The only form of lightning that does not register satisfactorily is sheet lightning. It merely uniformly illuminates a broad expanse of sky. With this kind of lightning, however, interesting silhouettes of trees and buildings can be secured.

And while discussing Nature's "lighting plant," pictures by moonlight should not be overlooked. Moonlight will serve to make pictures just as sunlight does, but as it is a great many times weaker than sunlight, exposures must be increased considerably. Perhaps the simplest way to calculate a moonlight exposure is to give 25 minutes for each 1100 second exposure that would be given the same scene by sunlight.

For example, the exposure in bright sunlight for a landscape with a dark-toned object in the immediate foreground, would be 1/250 of a second with stop f.11 or U.S. 8. Then the exposure by the light of a full moon would be 10 minutes with the same stop.

This could be cut down to 50 minutes with stop f.8 or U.S. 4. For a landscape without a dark-toned object in the immediate foreground about 25 minutes with f.8 or U.S. 4 would be ample, and for distant landscapes the exposure can be from 10 to 15 minutes.

If a daylight effect is desired, the exposure must be multiplied by four, and this applies only to nights when the sky is clear and the moon is full.

With a single lens and all fixed focus cameras, use the largest stop and double the exposures given above.

So let the sky light your way out-of-the-ordinary pictures.

JOHN VAN GUILDER.

## Precautionary Measures Needed In Selecting Field Crops To Be Grown In Dry Areas In West

### Red Clover Always Popular

Seed Supply Is Not As Large This Year

Red clover is always in popular demand in Canada and promises to be more than average demand this spring owing to the unusual shortage and high price of alfalfa and timothy seed. According to the Seed Branch, Dominion Department of Agriculture, the red clover seed supply is not as large as in most years. Last year's total production in Canada was about two and one-half million pounds, and with the half million pounds or so of imported English red clover seed there will be available for seeding in Canada this spring about three million pounds. The normal annual Canadian consumption is more than this being between four and five million pounds.

The continued low purchasing power of farmers will of course have an effect in reducing seed purchases, but the relatively low price for red clover seed, as compared with alfalfa seed, will probably increase the preference for red to the extent that the total supplies of red clover seed available will likely all be needed before the season is over.

Most of last year's red clover seed crop in Canada was grown in Eastern Ontario and Quebec, which is fortunate from the standpoint of seed hardness and purity. The greater part of this seed is now in the hands of the seed houses for resale, but considerable quantities are still held by the growers in the Plantagenet area in Eastern Ontario and in the Montreal district in Quebec.

Further information as to sources of supply may be obtained from the Seed Branch, Dominion Department of Agriculture, Ottawa.

### Made Aviation History

Plane That Once Commanded Headlines Now Carrying Fish

Lazily winging its way, a huge aeroplane of the monoplane type, may be seen daily playing a scheduled fish run between Cheecham, Alberta, 200 miles north of Edmonton, and the numerous lakes in the northland. Once it commanded newspaper headlines and played a part in making aviation history.

With Bert Balchen and Floyd Bennett at the controls, the big ship, in 1928, rescued Garth Gunther from the rocky island in the Strait of Belle Isle where they had smashed their aeroplane.

Later, the big monoplane carried the mother of Charles A. Lindbergh from Mexico City to New York when the flying colonel was engaged in a North and South American flight.

For three years the big, all-metal ship loaded with eight-seats, was a familiar sight over Niagara Falls. To-day, it is relegated to the commonplace task of hauling fish to market from the lakes in Northern Alberta.

The only substitute found so far for gasoline is lake leather.

Ventriloquism is one of the tricks of Vatuwitcher.

The crew of the Bremen hoped to return to land on April 32. That gasoline supply became exhausted after a 2,125-mile flight across the ocean. Almost within flying reach of New York, their objective, they were forced to land. Balchen and Bennett, in response to an SOS, rescued them from the rocky island in the Straits of Belle Isle where they had smashed their aeroplane.

Ventriloquism is one of the tricks of Vatuwitcher.

The scarcity of feed crops during the past season became more serious when it decreased the efficiency of farm horse power at the very time that power was urgently needed to enable return to more normal conditions.

Experiments and observations at the Dominion Experimental Station, Swift Current, Saskatchewan, indicate that precautionary measures in the future should include growing those crops which are now known to be more certain of production. Annual feed crops offer more security in most cases, when grown on summer-fallowed land.

Banner crops grown on summer-fallowed land at the Dominion Experimental Station, Swift Current, during the past thirteen years have never failed to produce reasonably good crops of fodder. Grasses and legumes have failed to provide stands in dry season. When established in a favourable location or in seasons of good rainfall, they have produced fair yields under conditions. The seeds, grasses and legumes in dry definite rotations have produced 40 to 60 per cent. less fodder than oat hay grown on summer-fallow.

When grasses and legumes are to be grown, they should be sown on land that is likely to be favoured with more than the average amount of soil moisture, such as can be supplied by run-off water by natural or artificial means. Tests indicate that seeding may be done in early spring or in June, also in the late fall in some districts. At the same time consideration should be given to prevailing soil moisture and seasonal conditions. The seed should be sown shallowly on a firm, level seed-bed.

Annual fodders, such as cereal crops cut in the late milk or early dough stage, are more adaptable to dry farming conditions. The seeds are large and may be planted deeply to prevent soil drifting. Wheat is a valuable feed for all classes of livestock except as fodder or grain.

Profilite spring ryegrass, Banner oats and Colman barley are also good annual hay crops. When grain crops are sown in combination for hay purposes the yield and palatability are likely to be improved. Fall ryegrass is very useful as an early maturing hay crop or as a supplementary pasture crop. Fall ryegrass and Banner oats 35 pounds per acre at any time from early spring to June 30, provide excellent annual pasture.—H. J. Kemp, Dominion Experimental Station, Swift Current, Sask.

### MEASURES UNWISE AND UNTIMELY (Edmonton Journal)

It was not simply because of the effect which the legislation would have on their own activities that Alberta newspapers protested strongly against the two bills with respect to judicial reports and libel that were passed on Saturday. The broadest kind of public interests were at stake, as was fully demonstrated in the course of the prolonged debate in the house. It was reported at length from day to day and followed closely by the people of the province, the great majority of whom must be convinced that the measures were as unwise as they were impertinent. By putting them through, especially at this time, the government has been very ill-advised.

The advocates of the legislation freely admitted that it was aimed at only a small portion of the Alberta press. No criticism was offered of the way in which the great majority of the newspapers had discharged the function of keeping their readers informed in regard to matters in which they are concerned. The attorney-general made a particular reference to the Journal, which he said had "never been a transgressor in regard to the decency of the news." Why, then, should all the newspapers have been subjected to the indignity and the vexatious trouble involved in the placing of these bills on the statute books?

They are without precedent in Canada and go even further than the English law to which frequent reference was made by the spokesmen of the government in seeking to justify the steps being taken. The need of preventing the publication of indecent and salacious material was not questioned by anybody. But the criminal code of Canada already gave the attorney-general adequate power to deal with individual newspapers which he thought were offending in this respect. Why should the government not have instructed him to prosecute any such offenders under the criminal code? That would have been quite sufficient. But instead of doing so it has insisted on the enactment of provincial legislation which is exceedingly unfair and burdensome to all newspapers—regardless of the manner in which they have met their responsibilities, and which will work out greatly to the disadvantage of the public at large.

The amendments that the government made to the bills, in response to the representations of the newspapers, show how very far it was prepared to go at the outset. While they are welcome, the legislation remains open to serious objections from both a newspaper and a public point of view. There was no excuse for its introduction and the circum-

### ASK FOR Kellogg's

NO SUBSTITUTE can give you the genuine value you get in Kellogg's—the original Corn Flakes. The red-and-green package holds many generous servings and costs but a few cents.

Kellogg's have a flavor that no imitation has ever matched. Their oven-fresh crispness is protected by an exclusive Kellogg feature—the heat-sealed WAXTITE inner bag. And because they're made by Kellogg in London, Ontario, you can rely on their guaranteed purity and quality.

Try them, and you'll know why Kellogg's Corn Flakes have become the largest-selling ready-to-eat cereal in the world.
